Green Surrounds

Bounded by Circuit Road and Paya Lebar Road, MacPherson Spring comprises four 19-storey residential blocks and offers 750 units of Studio Apartments and 3- and 4-room Standard Flats.

A park next to the development brings to mind the enjoyment of greenery, and is the inspiration for the name ‘MacPherson Spring’.
Modern Homes

MacPherson Spring offers Studio Apartments, 3- and 4-room Standard Flats.

The Studio Apartments are designed specially to meet the needs of those 55 years old and above. Each Studio Apartment will be in a ready-to-move-in condition and furnished with a built-in wardrobe. Resilient (vinyl) strip flooring will be provided in the living/dining area and bedroom while the bathroom and kitchen will come with floor/wall tiles. This will provide a hassle-free move-in process. Three-quarter height windows will be provided in the living/ dining area and bedrooms.

In addition, each Studio Apartment will come with a built-in cabinet with cooker hood and stove. Buyers can choose from two height options for the kitchen cabinet – default dimensions based on industry standard or lowered cabinets to suit the needs of wheelchair bound residents. For the convenience of residents, elderly-friendly fixtures will also be provided within the units. These include grab bars to provide support, a ramp at the unit entrance to assist movement, bigger switches and an alert alarm system.

The 3- and 4-room flats will come with three-quarter height windows in the living/dining area and half-height windows in other rooms. Balconies are introduced in the master bedroom of some 4-room flats.

The 3- and 4-room flats will come with floor finishes in the kitchen, household shelter, service yard and bathrooms. Wall tiles will also be provided in the bathroom and kitchen. For added convenience, you can choose from two options of floor finishes to be installed in your selected flat:

- **Option A**: tiles for the living/dining room and balcony (where applicable), and resilient (vinyl) strip flooring for the bedrooms; or
- **Option B**: tiles for the balcony (where applicable) and resilient (vinyl) strip flooring for the living/dining and bedrooms

You may also opt-in to have sanitary fittings installed in the bathrooms - wash basin, water tap and shower mixer. These sanitary fittings, together with internal doors, will be offered as a package. The cost of installing these optional components will be added to the selling price of the flat.

To provide greater flexibility in furniture layout and design, some 3-room flats and all 4-room flats will come with an open kitchen concept. You can carry out the necessary extensions to the electrical, water and gas points provided in the kitchen as part of your renovation plans. Alternatively, you may opt-in to have a partition wall installed between the living/dining area and kitchen. The cost of this optional wall will be added to the selling price of the flat.

Linear Design

At MacPherson Spring, the residential blocks are arranged in three rows and are interspersed with open spaces which house facilities for its residents to enjoy. These include the children’s playgrounds, adult and elderly fitness stations, a precinct pavilion and rest shelters. Additional recreational spaces are provided at a rooftop garden at the multi-storey car park block.

For the convenience of residents, a Residents’ Committee Centre and a childcare centre will be provided within the development. Seniors can visit the Senior Activity Centre to make friends and engage in regular social activities. A Day Activity Centre will provide care to persons with disabilities when their caregivers are unable to look after them during the day. It will also equip them with skills for daily living so they can be as independent as possible.

Located right next to the park will be a quaint single-storey cafe for residents to relax and rest. This will be complemented by a minimart nearby. At the park, more facilities abound. These include children’s playgrounds, an elderly fitness station and rest shelters.

Eco-Friendly Living

To encourage a ‘green’ lifestyle, MacPherson Spring will have several eco-friendly features:

- Separate chutes for recyclable waste
- Motion sensor controlled energy efficient lighting at staircases to reduce energy consumption
- Regenerative lifts to reduce energy consumption
- Eco-pedestals in bathrooms to encourage water conservation
- Bicycle stands to encourage cycling as an environmentally friendly form of transport
- Use of sustainable and recycled products in the development
Applicants are encouraged to visit the place before booking a flat.

Notes:
The proposed facilities and their locations as shown are only estimates. The proposed facilities may include other ancillary uses allowed under URA’s prevailing Development Control guidelines. For example, places of worship may also include columbarium as an ancillary use, while community centres may also include childcare centres. The implementation of the facilities is subject to review by the Government or competent authorities.
